PROFESSIONAL SUMMARY

MERN Stack Developer with hands-on experience building production-grade web applications using MongoDB, Express.js, React, Next.js, Node.js, TypeScript, and Tailwind CSS. Contributed to real-world SaaS products as a MERN Stack Intern, working across both frontend and backend within professional team workflows. Built AI and automation projects powered by Groq, Gemini, and Google Cloud APIs. Participated in 7 national and international hackathons, leading 3 teams. Actively seeking full-time MERN Stack Developer opportunities.

TECHNICAL SKILLS

Frontend Development: React.js, Next.js, TypeScript, Tailwind CSS, HTML5, CSS3
Backend Development: Node.js, Express.js, MongoDB, REST APIs
AI and Automation: Gemini API, Groq API, Llama 3.3 70B, Google ADK, Make.com
Developer Tools: Git, GitHub, Vercel, Figma, Canva, Linear

EDUCATION

Government College University, Faisalabad 2021 – 2025
Bachelor of Science in Information Technology CGPA: 3.45/4.0

Punjab College, Sialkot 2019 – 2021
Intermediate in Computer Science

PROFESSIONAL EXPERIENCE

MERN Stack Developer Intern Feb 2026 – Apr 2026
MatchHalf Hybrid, Pakistan

- Engineered 10+ frontend and backend features for a production-grade social networking application using Next.js, React, TypeScript, and Tailwind CSS
- Integrated 5+ REST APIs, profile sections, skeleton loaders, and tab navigation with URL parameter persistence, reducing page load inconsistencies
- Resolved 20+ Linear tickets and followed a PR-based Git review process on a live SaaS product within a professional team workflow

Information Technology Recruiter Jun 2025 – Aug 2025
Zynarvo IT Solutions Remote, United Kingdom

- Managed the end-to-end recruitment cycle for 10+ IT roles including candidate sourcing, screening, interview scheduling, and client communication

Content Writing Intern Jul 2025 – Sep 2025
GAOTek Inc. Remote, Canada

- Produced 15+ SEO-optimized blog posts and product descriptions for a global technology audience, increasing content visibility across major search engines
- Maintained 100% on-time delivery across all assignments while collaborating with a distributed remote team across multiple time zones

PROJECTS

Autovance AI MERN Stack, Groq API, Llama 3.3 70B, MongoDB

- Built a SaaS platform that allows users to automate business workflows including emails, webhooks, and form actions using plain English or Urdu natural language commands

AI Food Safety Analyzer Next.js, Gemini Vision API, Firebase, Google Cloud

- Built a real-time food safety analysis tool powered by Gemini Vision API to detect allergens and safety risks from food product images

HireGen AI MERN Stack, AI and ML APIs

- Launched an AI-powered hiring platform that auto-generates role-specific interview questions, assesses candidate responses, and produces detailed scoring reports

AI Feature Kit (Final Year Project) MERN Stack, AI and ML APIs

- Designed and shipped a modular web application consolidating five AI tools: Text-to-Image, Text-to-Voice, Background Removal, Text Summarizer, and Voice Changer
- Architected a modular codebase so each AI feature can be updated or replaced independently without affecting other modules

Edge-Native AIUC Gateway Node.js, Edge Computing

- Engineered a security middleware layer that automatically removes sensitive data including PII and API keys from AI prompts prior to external network transmission

HACKATHONS AND COMPETITIONS

- **Transforming Enterprise Through AI** (International, lablab.ai), Team Lead, led CipherSquad to build an enterprise AI solution
- **HEC GenAI Cohort 2** (National), Team Lead, GenAI project development under HEC Pakistan
- **HEC GenAI Cohort 3** (National), Team Lead, advanced GenAI use case design and implementation
- **Google AI Seekho Hackathon** (National), built an AI food safety solution using Gemini Vision API
- **Dev Launch Hackathon** (National), built and shipped a working product within the time limit
- **CodeSprint LA** (International), rapid application development sprint
- **AMD Developer Hackathon** (International), hardware-accelerated AI development challenge

KEY ACHIEVEMENTS

- 3x Hackathon Team Lead, 1 International and 2 National (HEC GenAI Cohort 2 and 3)
- 7x Hackathon Participant across 3 international and 4 national competitions
- LinkedIn content creator with 4,000+ followers covering developer journey, AI tools, and technology
- 5 certifications in Generative AI and Microsoft Copilot
